## 220bhp Race Spec Head Kit

In order to squeeze every last ounce of power out of your engine we have added a set 45mm Jenvey throttle bodies with loom kit, coil pack and HT lead kit. The throttle bodies are supplied with a Race breed Emerald K6 ECU , the Big valve head further enhances torque spread and top end bhp. The Throttle bodies give lightening fast throttle response and peak power 7200rpm. The icing on the cake is the inclusion of a race breed ECU to ensure your race head kit works to its full potential while giving you the benefits of launch control and the capability to run 3 separate maps.

It goes without saying the induction roar from these throttle bodies is enough to make the hairs on your neck stand on end.
