190bhp Competition Head kit (A),(C)

More suited to motorsport and track day applications. Every ounce of power is squeezed out of the GTI-6 engine while maintaining the standard inlet manifold and ECU. Wilder cams, FSE boost valve and a ported throttle body vastly improves throttle response, mid range torque and top end power.

+220bhp Race Spec Head Kit (A),(C)

In order to squeeze every last ounce of power out of your engine we have added a set 45mm Jenvey throttle bodies with loom kit, coil pack and HT lead kit. The throttle bodies are supplied with a Race breed Emerald K6 ECU. The Throttle bodies give lightning fast throttle response and peak power 7200rpm. The icing on the cake is the inclusion of a race breed ECU to ensure your race head kit works to its full potential while giving you the benefits of launch control and the capability to run 3 separate maps.

It goes without saying the induction roar from these throttle bodies is enough to make the hairs on your neck stand on end.
