Competition Head kit (A)

Giving you the best performance for your 'buck' this kit is best suited to those competing in motorsport events or the track day die hards running on Twin carbs or throttle bodies. No loss of power below 3000rpm, but by 4500rpm through to 7700rpm the engine pulls with alarming urgency. Superb head kit !

Race Spec head kit (a)

In order to squeeze every last ounce of power out of your engine, we have included a big valve head fitted with forged inlet valves, solid lifter Kit, a Pair of Jenvey Throttle Bodies and an Emerald K6 ECU. The icing on the cake is the inclusion of a race breed ECU to ensure your race head kit works to its full potential while giving you the benefits of launch control/variable boost control and the capability to run 3 separate maps.

Peak power at 8500rpm
